In other buzz-worthy news:

Cursive Writing:

We will continue to slowly and surely incorporate cursive into our daily activities.

Science

Last week, we started our newest science unit titled, “Earth Science.” Our first investigation discussed weather and climate. We learned about predicting

the weather, and what factors contribute to the weather in our area of the world. We also check the weather (pressure, humidity, wind speed/direction) to determine if precipitation was possible—and what type of precipitation. This week, we will focus on weather and climate related vocabulary as well as create our own daily weather logs.

Math:

Our new math series combines both multiplication and division concepts before specific fact mastery—which is why we started our division mini unit last week. We will continue to focus on both multiplication and division—as well as their relationships with addition, subtraction, and each other. As a class, we have mastered our x2 and x5. We will focus on x3 and x4 this week.

English/Writing:

This week, we will start putting our own informational writing ideas into rough drafts. So far, we have learned SEVEN various strategies for gathering information and creating TOPICS and SUBTOPICS. Our latest strategy involves using cause and effect, compare/contrast, sequencing, and descriptions to writing an informational essay.
